

Yingling Chen

Seeking mechanical design / structural design internships

chenyingling5245@gmail.com · 15871847840

github.com/Afazeni

Education

Wuhan Polytechnic University · B.Eng., Intelligent Manufacturing Engineering

2024.09 — 2028.06

Top 10% academically. Coursework: mechanisms, mechanical design, engineering drawing, theoretical mechanics, mechanics of materials, manufacturing technology, and metrology.

Selected projects

Anban Care · Reconfigurable companion robot

Feb — Aug 2026

Team lead · Mechanical design

Team lead responsible for the overall mechanical concept and CAD model, including the reconfigurable hand, transforming wheels, body-to-seat mechanism and chest locking structure. Work also covered finger dimension optimization, motion simulation and structural analysis of key components.

Gentleman Grooming · Automated facial care concept

Apr — Aug 2026

Team lead · Mechanical design

Team lead responsible for the overall mechanical concept and CAD model, including the mobile base, four-axis module, curved telescoping wrapping mechanism and detachable shaving foil. Work included dynamics analysis of the relevant mechanisms.

FoodCraft · Foldable multi-material food printer

2025

Team lead · Mechanical design

Team lead responsible for mechanical concept development and CAD modeling, with a focus on the folding gantry, material switching mechanism and integrated feed-and-switch cartridge.

Frog Processing System · Modular automated processing concept

Jul 2026 — Present

Team lead · Mechanical design

Team lead responsible for mechanical concept development and CAD modeling, including orientation and processing mechanisms. Work includes a single-input multi-slider linkage, a ring-cut clamping concept and component-level structural analysis.

Technical skills

CAD: SolidWorks, NX, AutoCAD. Simulation and optimization: Ansys, Adams, MATLAB, Fusion. Programming: Python and C/C++ fundamentals. Familiar with 3D printing workflows, common manufacturing processes and DFM/DFA.

Selected honors & patent applications

National First Prize, National 3D Digital Innovation Design Competition. Second Prize, Chinese College Students Mechanical Engineering Innovation Competition. Second Prize, China University Intelligent Robot Creative Competition. Contributing inventor on two published invention patent applications concerning food 3D printers and cartridge structures.
